

Riptronix is looking for a customer-focused team player working on-site in a mission-oriented environment. The candidate must be a self-starter, possess good communication skills, and be willing to interface with multiple teams.

We are currently seeking Threat Analysts to research, collect, process, and analyze all-source intelligence. Identifies and derives cyber capabilities and activities of cyber criminals and foreign intelligence entities who pose a threat to DoD information systems and their infrastructure.

Qualifications:

- Must possess an active TS/SCI Clearance with Full-Scope Polygraph
- Provide subject matter expertise to the development of cyber operations intelligence indicators.
- Maintain a common intelligence picture
- Coordinate, validate, and manage all-source collection requirements, plans, and activities
- Assist in the identification of intelligence collection shortfalls
- Brief threat intelligence findings/reports to customer and stakeholders
- Collaborate with intelligence analysts/targeting organizations involved in related areas
- Conduct in-depth research and analysis
- Develop intelligence needs requirements necessary for answering priority information requests
- Engage customers to understand customer's intelligence needs and wants
- Identify adversarial threat tactics, techniques, procedures, and methodologies
- Monitor and report changes in threat dispositions, activities, tactics, capabilities, and objectives
- Monitor and report on validated threat activities
- Monitor open-source websites for hostile content directed towards customer interest
- Produce timely, fused, all-source threat intelligence and indications and warning intelligence products (e.g., threat assessments, briefings, intelligence studies, country studies)
- Provide subject matter expertise and support to planning/developmental forums and working groups as appropriate
- Provide information and assessments for the purpose of informing leadership and customers
- Assimilate intelligence data from disparate sources and summarize the data to develop information for further analysis or action
- Work closely with planners, intelligence analysts, and collection managers to ensure intelligence requirements and collection plans are accurate and up-to-date
